MIT School of Computing

MIT-ADT UNIVERSITY
PUNE, INDIA
A leap towards World Class Education
(Established by MIT Art, Design and Technology University Act, 2015 Maharashtra Act No. XXXIX of 2015)

Name of Examination: Assessment – I Aug-2024

Programme: B. Tech. **Year:** SY **Academic Year**: 2024-25

Branch: Computer Science & Engineering **Semester**: III

Subject Code: 23CSE1011 **Subject Name:** Economics for Engineers

Date: 26/08/2024 **Time**: 09:30 am to10:30 am **Max.** Marks: 20

Instructions: -

1. **Attempt the any 4 out of 6 questions**.
2. Neat diagrams must be drawn, wherever necessary.
3. Use of slide rule, Mollier chart, electronic scientific calculator and steam tables are allowed.
4. Figures to right indicate the marks allotted to the questions.

1) Distinguish between microeconomics and macroeconomics. How do they differ in their scope of study? Explain it with suitable examples (5)

2) During the holiday season, a cinema chain increases ticket prices from Rs.100 to Rs.120. Despite the price increase, the quantity demanded decreased only slightly from 1,200 tickets to 1,150 tickets per day. Calculate the price elasticity of demand and discuss whether the cinema chain was correct in raising prices during the holiday season. (5)

3) A retail store decides to expand and faces Rs. 2,30,000 in additional fixed costs. Each item in the store sells for Rs. 80, with a variable cost of Rs. 35 per item. Determine the break-even quantity, break-even sales, contribution, and margin of safety considering the actual sales is 7000 units. (5)

4) Explain the three stages of the Law of Variable Proportions using a production function (5)

5) Discuss the relationship between Total Revenue (TR), Marginal Revenue (MR), and Average Revenue (AR) in imperfect competition (5)

6) Explain Firm's short run Fixed cost, Variable cost, Total cost and Marginal Costs with suitable schedule and diagrams (5)
